DINOSAUR TRACKS

Late Triassic Dinosaur Trackway

This large plate exquisitely preserves dozens of theropod (Grallator-type) dinosaur tracks, as well as numerous small lizard-like Rhynchosauroides tracks. One of the continuous Grallator trackways contains eight footprints. The tracks are dramatically framed against a background of highly detailed mud cracks. This plate is one of the finest track and trackway specimens available.

App. 10 feet long x 4 feet wide \$1,900

CALL FOR SHIPPING COSTS, NOT AVAILABLE IN SHOPPING CART.

Plate is finished and colored, with scientific information included. Shipped in four fragments by UPS.
Other Triassic Tracks and Trackways available!
